Future Green Biorefinery Pathways for Industry

James Gaffey

12.03.2024

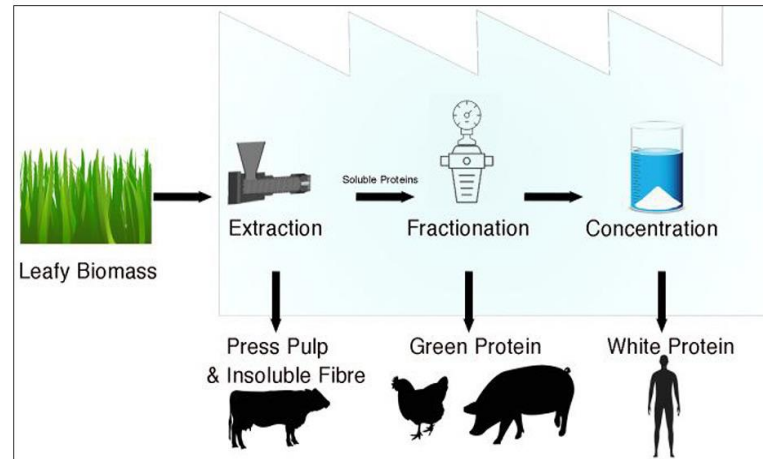

MAINSTREAM BIO
MAINSTREAMING SMALL SCALE BIO-BASED
SOLUTIONS ACROSS RURAL EUROPE

www.mtu.ie

Technology pathways for industry

- GBR models can now meet multiple product market needs simultaneously
- Fits very well in a cascading model which includes energy/fertilizer production
- Balancing between farm input requirements, while diversifying grass markets

Bringing industry on board

- Show how we GBR can resolve challenges for industry
- Collaboration through Demonstration
- Build on existing industry structures and links where possible to scale
- De-risk investment for early movers (industry champions)
- Show them the money!

“Innovating and collaborating is our best chance of surviving.” – Biorefinery Glas Farmer
